

NON-SEWERED WATER EXEMPTION REQUEST

Service No. _____ TMK: _____ - _____ - _____ : _____

Address: _____

I hereby request a non-sewered water exemption for the following water consumption:

- | | |
|--|--|
| <input type="checkbox"/> Agricultural or Landscaping | <input type="checkbox"/> Swimming Pool |
| <input type="checkbox"/> Ice-making Equipment | <input type="checkbox"/> Cooling Tower |
| <input type="checkbox"/> Washdown Facility | <input type="checkbox"/> Other: _____ |

I propose to install at my own expense an approved type of sub-meter in a location readily accessible for inspection. I have attached the plans of the system piping including product data and location of the sub-meter for Wastewater Division approval. If approved, I agree to the following conditions:

- The water drawn through such sub-meter(s):
 - will not be discharged into the sanitary sewage system.
 - represents all water drawn on the property that may be discharged into the sanitary sewage system.
- I will read the sub-meter(s) to coincide with the water bill cycle and I will submit the sub-meter reading(s) bi-monthly or monthly dependent on the water billing cycle, five days after receiving the Department of Water Supply water bill. I will also provide a copy of the water bill.
- Right-of-Entry is authorized to the Wastewater Division for purposes of reading meters and conducting inspections at their discretion.
- Depending on when the readings are submitted, the adjustment may be made in a subsequent billing period.
- A minimum monthly charge shall be applicable and shall be equal to the current monthly rate at the time of the exemption period.
- This exemption is non-transferable. I will notify the Wastewater Division of any changes in ownership or property use.
- If the tamper-resistant seal on the sub-meter(s) is found to be broken, the owner shall replace the meter within 30 days. Failure to comply will result in the exemption becoming void and a new exemption request application will need to be submitted to the Wastewater Division.

Completed Request should be returned to Wastewater Division, 108 Railroad Avenue, Hilo, HI. 96720
